

*Tadson works within your strict specifications during every phase of glass fabrication.*

## Tadson Custom-fabricates Close-tolerance Glass Parts and Components...On Short Notice

*Tadson provides precision custom glass work for a wide range of industrial applications. Special attention is given both to tolerances and delivery date, so you receive your high-quality parts...right on schedule.*

*Tadson brings you greater flexibility in size, material, shape, and design of your glass parts and components.*

**A**s a custom fabricator, Tadson works to the exact configurations specified on your drawings, whether you need a single prototype or a parts run of 15,000.

### GENERAL CAPABILITIES

Tadson brings you greater flexibility in size, material, shape, and design of your glass parts and components—whether round, rectangular, prismatic, or irregular.

We are equipped to handle sizes ranging from .050" to 20" Dia. with tolerances to .0005" on small parts.

We fabricate parts from a wide range of materials, including:

- Optical Glass—All Varieties
- Filter Glasses—All Types
- Low-expansion Materials
- Fused Quartz
- Soda Lime Glass
- Ceramics

**Cosmetic excellence is guaranteed.**

Short lead times are our specialty. The nature of our operation allows us to devote close attention to delivery dates, as well as tolerances, so that you can meet your own production deadlines with a high-quality product.
